Practical Breaks

J—My wife is always asking me for money. She wants three dollars, two dollars, five dollars, and thirty cents.

H—What does she do with all that money?

J—I don't know. I haven't given her any yet.

J—I came by your house to-day and I saw your wife washing.

H—I want you to understand, sir, that my wife doesn't do any washing.

J—I thought so from her looks

J—An Irishman got on the police force. The chief said, "If you get drunk I want to know it. You must come to me and report it the next day. The Irishman got drunk; the next day he went to the chief to report it. The chief said, "You are drunk now." The Irishman said, "I know it, but I don't have to report until to-morrow."

H—A Jew boy and an Irish boy were fighting. The Irish boy was punching the Jew boy in good shape. The Jew boy wasn't making any effort to hit the Irish boy at all. The Jew boy's father was watching them. He said, "Iky, why don't you lite into him and lick him?" Iky said, "I can't father, I'm standing on a dime."

Cakes, Etc.

Snow Cake — One-fourth cup butter, 1 cup sugar, one-half cup milk, one and two-thirds cups flour, two and one-half teaspoons of HARRISON'S baking powder whites 2 eggs, one-half teaspoon vanilla or one-fourth teaspoon almond extract; bake forty-five minutes in a deep narrow pan.

Chocolate Frosting — One and three-fourth cups sugar, three-fourths cup hot water, 4 squares chocolate, melted, one-half teaspoon vanilla; boil sugar and water, without stirring, until syrup will thread when dropped from tip of spoon; pour syrup gradually on melted chocolate and continue beating until of right consistency to spread, then add flavoring.

White Mountain Cream — One cup sugar, one-third cup boiling water, white one egg, one teaspoon vanilla or one-half tablespoon lemon juice; put sugar and water in a saucepan and stir to prevent sugar from adhering to saucepan; heat gradually to boiling point, and boil without stirring until syrup will thread when dropped from tip of spoon or tines of silver fork; pour syrup gradually on beaten white of egg, beating mixture constantly, and continue beating until of right consistency to spread, then add flavoring and pour over cake, spreading evenly with back of spoon; crease as soon as firm; if not beaten long enough frosting will run, if beaten too long, it will not be smooth; frosting beaten too long may be improved by adding a few drops of lemon juice or boiling water; this frosting is soft inside and has a glossy surface. If frosting is to be ornamented with nuts or candied cherries, place them on frosting as soon as spread.

H—Why is an old maid like a wilted apple?
J—Because she is hard to pair.

H—I lost my watch last night.
J—Did you advertise for it?
H—Yes, I told my wife.

H—Your brother stole our gate.
J—Why didn't you speak to him about it?
H—I was afraid he would take a-fence.

H—What is a zebra?
J—A zebra is a mule's brother, only he looks like a convict.

H—What is a cow frog?
J—A bullfrog's sister.

H—Let me insure you for five thousand, so when you die your children will get it.
J—Suppose I haven't got any children?
H—You can't blame me for that.

J—There is a young lady living next door to me that plays the piano until twelve o'clock, and our baby cries all night.

H—My goodness, how do you sleep between the piano and the baby?
J—I sleep in a bed by myself.

Cakes, Etc.

Macaroons—One tablespoon butter, 1 cup white sugar, 2 cups rolled oats, one-half teaspoon salt, one teaspoonful HARRISON'S baking powder two eggs beaten separately, 1 teaspoon bitter almonds; bake quickly on greased pan.

Corn Meal Gems—One-half cup corn meal, 1 cup flour, 3 teaspoons of HARRISON'S baking powder, one tablespoon sugar, 1 tablespoon melted butter, one-half tea spoon salt, three-fourth cup milk, 1 egg.

Entire Wheat Griddle-Cakes—One-half cup entire wheat flour, 1 cup flour, 3 teaspoons HARRISON'S baking powder one-half teaspoon salt, 3 tablespoons of sugar, 1 egg, one and one-fourth cups milk, 1 tablespoon melted butter.

Bread Griddle-Cakes—One and one-half cups fine stale bread crumbs, one and one-half cups scalded milk, two tablespoons butter, two eggs, one-half cup flour, one-half teaspoon salt, three and one-half teaspoons HARRISON'S baking powder; add milk and butter to crumbs, and soak until crumbs are soft; add eggs well beaten, then flour, salt and baking powder mixed and sifted; cook as other griddle-cakes.

Baking Powder Biscuits—Two cups flour, 4 teaspoons HARRISON'S baking powder, 1 teaspoon salt, 1 tablespoon lard, three-fourths cup milk and water in equal parts, 1 tablespoon butter; mix dry ingredients, and sift twice; work in butter and lard with tips of fingers; add gradually the liquid, mixing with knife to a soft dough; it is impossible to determine the exact amount of liquid, owing to differences in flour; toss on a floured board, pat and roll lightly to one-half inch in thickness; shape with a biscuit-cutter; place on buttered pan, and bake in hot oven twelve to fifteen minutes; if baked in too slow an oven, the gas will escape before it has done its work; many obtain better results by using bread flour.

The investigation of a Russian doctor, Dogiel, and of an English specialist in brain diseases, indicate that music affects the nerve centers which govern the circulation of the blood, causing an appreciable enlargement of the blood vessels, and, consequently, greater activity in circulation and increased nutrition of the tissues. It is therefore recommended as likely to hasten the cure of a malady. The curative powers of music seem to have been known for centuries, as the Biblical story of how Saul was cured by the harpings of David is cited as the greatest familiar case on record.

J—Everybody I can.

J—I got on a train and I said to the Brakeman,
"Where shall I wash? He said, "All over if you
want to."

J—Where do you live?
H—At the corner of Sleet and Snow.
J—When I get a skate on I'll slide around and
see you.

H—The world seems to treat some people all right
but the trouble is it does not treat me often enough.
I was told once it was healthy to walk after meals;
I have been walking after mine ever since. I am just
eight blocks behind dinner now.

ENGLISH SHEEP AND CATTLE WASH

A SURE TICK AND INSECT KILLER

The best time to use this is early in the spring, just before the Lambs are dropped. Select a mild day, make the solution as directed; part the wool upon the sheep, pour the wash over them. This will destroy the Ticks and prevent them going upon the lambs. Lambs will not thrive that have Ticks upon them. Lambs free from Ticks will bring \$1.00 more in price than those that are raised having Ticks upon them. Nothing will pay better than this simple plan.

IT IS SAFE, SURE AND PROFITABLE

**USE ONLY THE ENGLISH
SHEEP AND CATTLE WASH**

We have sold this for years. Farmers who once try it will use no other. Try it this year. We recommend it.

J—Did you blow in on the last train?
 H—Yes, I blew in about 3:45.
 J—I can't see that joke.
 H—You are too far away.

J—Did you ever sleep with cold feet?
 H—Yes, I'm a married man.
 J—Is your wife living?
 H—Not with me.

H—They talk about weak women, did you ever get mixed up with them at a bargain sale?
 J—That reminds me that the Bible says man is made of dust. The way some women spend money he should be.

H—Who is the most valuable, man or woman?
 J—Man. They always give the bride away.

J—I was reading a paper called the Skyscraper. It had eighteen stories. I was looking down the birth column to see if there was any one born that I knew. I read some of the advertisements. They went something like this: Wanted a man to handle dynamite in a match factory. A splendid chance to raise. Wanted a girl to work in a store. Partly on the outside and partly behind the counter. For sale—An automobile, by a man with a tank holding ten gallons. A bear was killed by a boy nine feet long. Wanted—A woman to do housework. She must wash every week.

Puddings, Etc.

Angel Food—Whites 3 eggs, one-half cup powdered sugar, one quart cream whip, one and one-half teaspoons vanilla; beat eggs until stiff, fold in sugar, cream whip, and flavoring; line a mould with Delmonico ice cream, fill with the mixture, cover, pack in salt and ice, and let stand two hours.

Delmonico Ice Cream and Angel Food—Two cups milk, three-fourth cup sugar, one-eighth teaspoon salt, two and one-half cups thin cream, one tablespoon vanilla, 1 teaspoon lemon; make custard of milk, sugar and salt, cool, strain and flavor; whip cream, remove whip; there should be two quarts; add to custard, and freeze; serve plain or with angel food.

Pineapple Frappe—Two cups water, 1 cup sugar, juice 3 lemons, 2 cups ice water, 1 can grated pineapple or 1 pineapple shredded; make a syrup by boiling water and sugar fifteen minutes, add pineapple and lemon juice; cool, strain, add ice water, and freeze to a mush, using equal parts ice and salt; serve in frappé glasses. If fresh fruit is used, more sugar will be required.

Bavarian Cream (Quick)—One-half lemon, grated rind and juice, one-half cup white wine, one-third cup sugar, 2 eggs, 1 tablespoon cold water; 1 teaspoon granulated gelatine; mix lemon, wine, sugar, and yolks of eggs; stir vigorously over fire until mixture thickens, add gelatine soaked in water, then pour over whites of eggs beaten stiff; set in pan of ice water and beat until thick enough to hold its shape; turn into a mould lined with lady fingers, and chill; orange juice may be used in place of wine, and the cream served in orange baskets.

A tablespoon of vinegar added to the water in which fish is boiled will make the flesh firmer and improve its flavor.

Buy when Eggs are Cheap?

ENGLISH WATER GLASS FOR PRESERVING EGGS

This is a glass having the peculiar property of dissolving in water. The shell which covers and protects an egg is neither air nor water tight, and through its pores enter germs and microbes which soon render the eggs unpalatable. Many ways have been tried, such as covering with wax, vaseline, salt, lime, etc., with only partial success. English Water Glass immediately closes all pores and the egg is covered by a thin case of glass. It is thus hermetically sealed, and will keep for years.

J—Did you ever hear the story of the furnace?

 J—It was a hot one.

H—I felt sick when I was in Quebec and went to see a doctor. He advised me to take a trip. He told me to get on a railroad train and I would feel better off.

H—Did you ever have your head examined?
 J—Once, and the teacher wouldn't let any one sit close to me afterwards,
 H—You have got a good head, but there's nothing in it.

J—Is there anything in yours?
 H—Yes.
 J—Kill em.
 H.—If your brains were dynamite and some one would touch them off, it wouldn't tilt your hat.

H I see where the universities are going to graduate ten thousand more civil engineers.

J-As far as I can see we have enough civil engineers, what we want is more civil conductors.

H-Do you know Jim you remind me of an old friend of mine.

J-I suppose your friend was a millionaire?

H-No he was not a millionaire, he was a hack driver.

J-Do I look like a hack driver?

H-No I don't think you look like a driver, but I do think you look like a hack.

J-Oh! I see now why my friends have always considered me hansom.

J-Where is the other side of the street?

H-Why, over there.

J-I was just over there and they told me it was over here.

H-Did you hear about the fright I got at my wedding?

J-No, I did not need to hear about it, I was there and saw her.

H-Did you hear that one of the American multi-millionaires considers it a crime to die rich?

J-Well, if being rich is considered a crime I am willing to go before any jury and prove my innocence.

Frost on Windows

The owners of display store fronts have continual cold weather trouble from the frosting of their windows, and house-keepers are also worried to a less extent by the frigid appearance of the same thing. This may be prevented by painting the glass with a solution of glycerine in 63 per cent. spirit of wine. Glycerine, like chloride of lime, has the property of absorbing water, and this action overcomes the difficulty. For show windows sulphuric acid may be employed, as is done in Russia. This, however, is only efficacious where the windows are double. The cracks between the two window frames and around the edges are kept tightly sealed, and several small vessels half filled with concentrated sulphuric acid are left in the space between the plates of glass. But the simplest and best cure of all for frosting windows is to have a small electric fan playing near it continuously. The air is thus kept in motion, and there is no chance for the frost to settle on the glass.

Magic Age Table

To ascertain any person's age with the aid of this table, request him to inform you in which column or columns his age is contained; add together the figures at the top of the columns in which his age is to be found, and you have the secret. Thus, supposing his age to be seventeen, you find that number in the first and fifth columns; add the first figures of these two columns. Here is the magic table:

Antidotes of Common Poisons

Arsenic—Get patient to vomit by giving sulphate of zinc, whole mustard, alum, blue vitriol, or rubbing a feather up and down the throat. Give milk, magnesia, white of egg. The after treatment is to give bland drinks, as gruel, barley water, etc., with opiates, and stimulants if necessary.

Blue Vitriol—White of egg, milk, wheaten flour, etc., in abundance.

Mercury or Corrosive Sublimite—White of egg, gluten (wheaten flour), milk, magnesia. In all cases of poisoning, it may be stated here, the stomach must be emptied as soon as possible by emetics, as before mentioned, and as soon as the stomach is empty the antidotes may be given. Give opiates for pain.

Antimony—Promote vomiting by giving large quantities of tepid water with milk. Tannic acid in some shape should be given, as pure tannic acid or tincture of galls, tincture of Peruvian bark or strong green tea.

Opium—Use a teaspoon of the wine of ipecac every fifteen minutes, until vomiting comes on. Give patient lots of strong coffee as long as he can drink. Keep him walking or moving in some way, even if he has to be supported; or beat on the feet with a stick good and smart.

Cold Feet and Sleepy Hands

A correspondent writes: Please give me a remedy for cold feet. I wear good footwear by day and I have warm bed clothing at night, but I never have warm feet. Also a cure for hands that go to sleep.

A. Bathe the feet in very cold water just before retiring at night, and rub them with a rough towel until they are dry, red and warm. Take the following prescription for several weeks, and you will have no further trouble with the hands and there will be less suffering from cold feet:

R.—Strych. sulph.....gr. 1-50
Ft.—One tablet No. 100.
Sig.—One after each meal.

To scald milk set it in a jug or basin in a pan of cold water over the fire. When the water boils the milk is scalded.

Hints for the Home

Good flour will lump when pressed in the hands.

To prevent salt from caking, add a little arrowroot.

For sick headache rub peppermint oil on the temples.

The best lemons are full and hard and have thin skins.

To cut hard boiled eggs in smooth slices dip the knife in water.

Mixed mustard will keep a better color if a pinch of salt is added.

To remove quickly the paper from the bottom of a cake hold it in front of the fire.

When an oven is too hot for the proper baking of its contents put a basin of cold water inside.

Avoid dark-skinned potatoes with thickly set eyes. The smaller the eye the better the potato.

Never slam an oven door when anything is baking. Such a proceeding will ruin the contents.

Beware of canned fruits if the ends of the cans are bulged out; it means that the fruit has fermented.

All stoned fruits are considered to be injurious for those who suffer from the liver, and should be used cautiously.

Always buy a small, hard cabbage in preference to a large, loose-leaved one; it will taste better and there will be more of it.

In buying asparagus pick out the bunches with long, thin stalks that are green almost up to the butt of the stalk. They are younger, more tender and better flavored.

Babies should always be encouraged to stretch their limbs and crawl about in order to promote and strengthen circulation. Let the infant be on its back sometimes, and push something solid with its feet.

Toronto, March 22nd, 1905.

For three or four months my little girl suffered intensely from Eczema, her face and body being almost completely covered with it.

During that time I had her under the care of one of the best doctors I could procure, but nothing he could do gave her relief. One night I was advised to try your MIRA OINTMENT, which I did, purchasing a fifty cent box from a drug store near by and was delighted at the results, the first application doing good and on continuing the Eczema left.

I was very glad to get it, as it is a wonderful cure, and it gives me pleasure in recommending it to any one who is unfortunate enough to require the same.

Yours truly,

MRS. J. WEBB, 175 Dovercourt Street.
